

657492 Sizzix® Bigz™ Die - Tattered Pinecone by Tim Holtz®

1. Die-cut 3-D Pinecone as shown.

2. Using just your fingers, tightly roll the first three petals of the cone.

3. Add contour to each petal. A thin dowel or skewer is the perfect tool for this project.

4. Securely attach the dowel or skewer to the rolled petals. Using adhesive, insert the skewer into the assembly as shown.

5. Wrap the remaining petals around the skewer. You may want to add adhesive between wraps to keep the petals in position.

6. Finish building the cone by placing an adhesive at the base of the assembly before wrapping the final petal.

7. Arrange, paint or embellish the Pinecone while it is attached to the skewer.

8. Clip the Pinecone off of the skewer when finished and use as desired.
