

Piggy Bank, 3-D

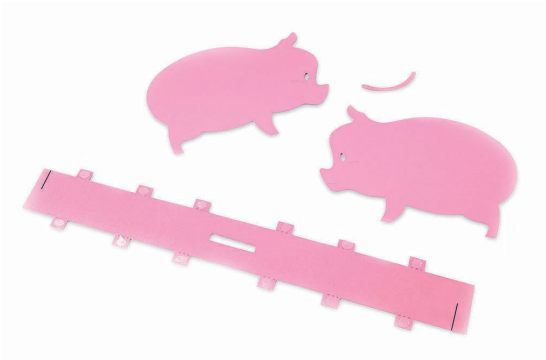

Figure A

Figure B

Figure C

Figure D

The teacher will die-cut the materials for student use prior to the lesson.

1. Die-cut from material of choice and apply adhesive to the side tabs of the center strip (Figure A).
2. Make the center strip into a cylinder by interconnecting the slits at each end with the end tabs on the inside of the cylinder. Fold in side tabs (Figure B).
3. Adhere the cylinder to one of the side pieces, with the coin slot at the top of the pig's back (Figure C).
4. To ensure that the feet are aligned, adhere the remaining side with the pig in standing position and all four feet on a flat surface (Figure D).
